

# How much each rock band made ?

How much each rock musician earned in USD ?

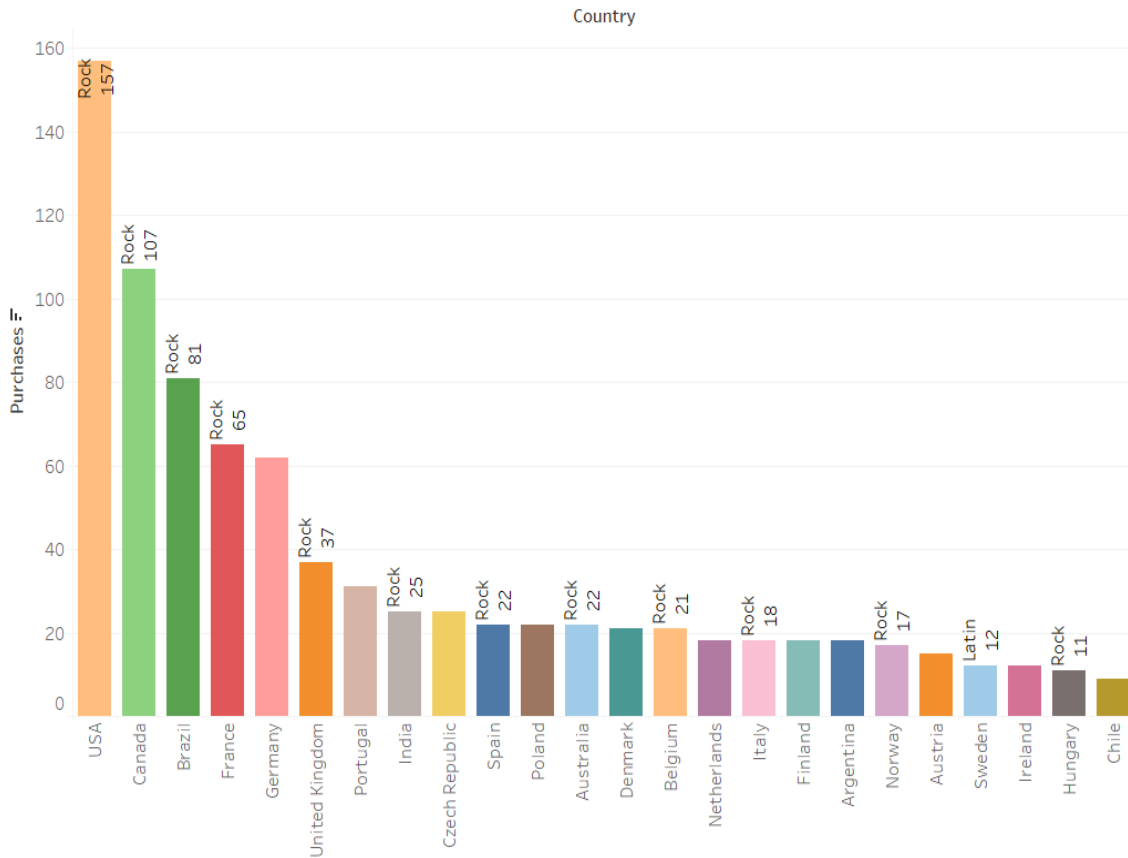

I'm showing only the top 12 band as it's hard to show all the 165 band.

From the 135<sup>th</sup> band to the end only one track is purchased for each.

# Most famous genre in each country

The most popular music Genre in each Country

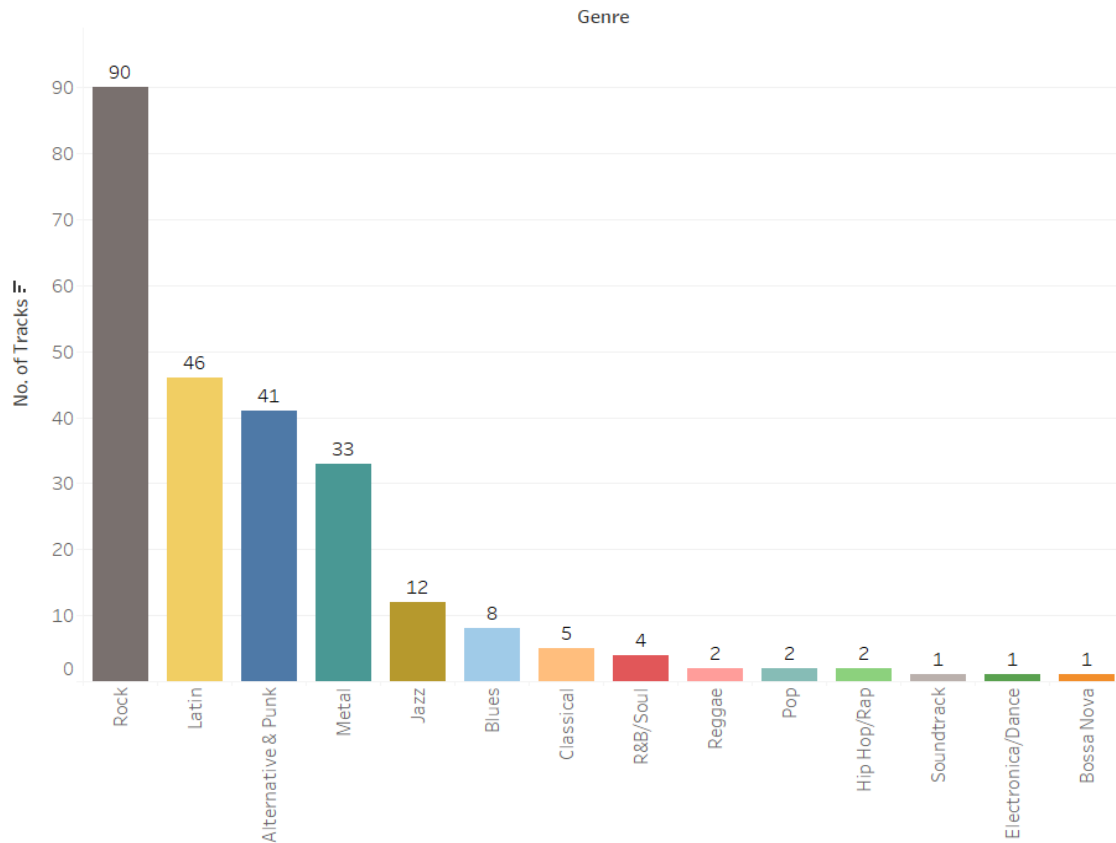

According to number of purchases, Rock is the most popular genre in almost all countries except for Sweden, Latin is the most purchased music genre by 12 times but the genre comes right after it is Rock by 10 times.

Argentina doesn't have a label on it because Rock and Alternative & Punk are purchased equally by 9 times.

# No. of tracks purchased more than once

No. of tracks purchased more than ONCE in each music Genre

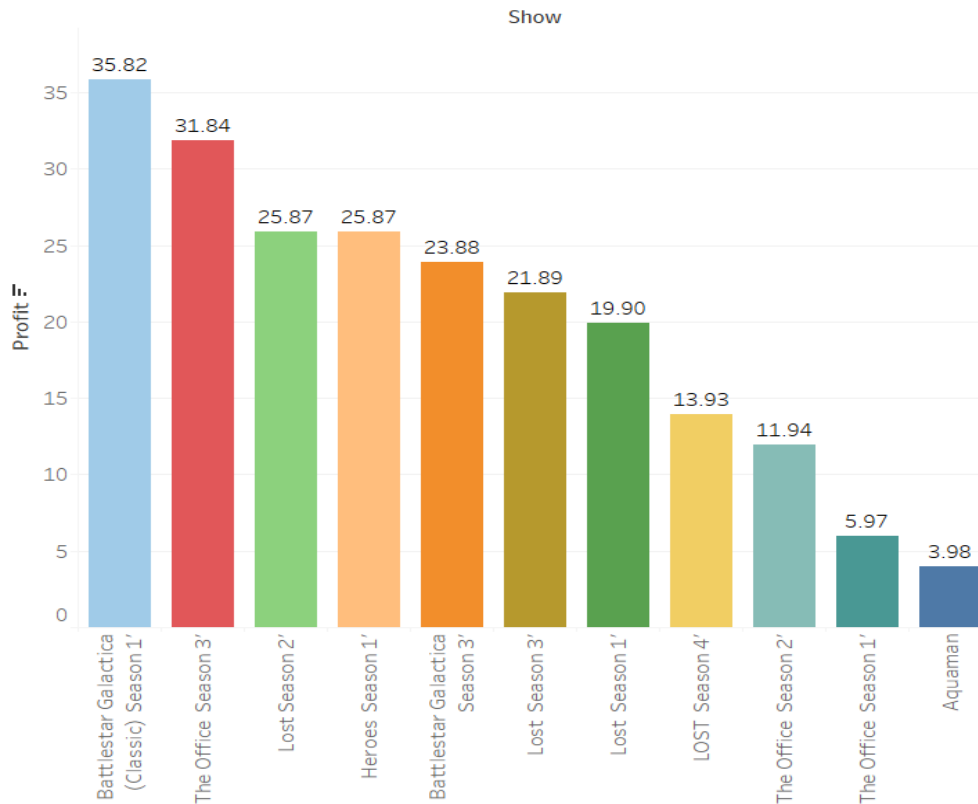

As Rock is the most popular genre in almost all countries so it's reasonable that many tracks in that genre purchased more than once, comes after it Latin then Alternative & Punk.

I only included music genres in this query.

# Profits of the shows in the data

Profits of shows

I used genres ("Science Fiction", "TV Shows", "Sci Fi & Fantasy", "Drama", "Comedy") to retrieve the shows from the data, and summed up the unitprice column in Invoiceline table and grouped the data by the Album title which is the name of the show in this case.
